

A B S T R A C T

The method comprises the steps consisting in: lining
5 a mold (30) of elongate shape and substantially U-shaped
section with a pastry dough (50) covering the bottom of
the mold and its side walls over a fraction only of their
height up from the bottom, pouring a confectioner's mix
(58) onto the dough, covering the dough and the
10 confectioner's mix with a trimming of fruit or pieces of
fruit (62) mixed with a gelling composition by pouring
the trimming into the mold up to the top thereof, and
baking the dough and the confectioner's mix with the
trimming in the mold.
